Absolute Power-18 Pure Transmission Power Cord

Furutech's Award-Winning Pure Transmission Build Quality

Picking up a Furutech power cord, from the supple, beautifully-made \$99 replacement for CD and DVD players (G-320AG-18F8) or our excellent \$140 power cord (G-314Ag-18) to this high performance 1.8m cord, the integrity of the cable's build is immediately apparent. Furutech Pure Transmission quality turns a macro lens on every element of power and signal transfer applying optimized

engineering solutions to well-known problems such as contact resistance, EMI and RFI rejection, and using the best materials and processes available.

Meticulous attention to build quality is a large part of the engineering equation: The Absolute Power-18 features rhodium-plated nonmagnetic pure copper fittings, and the 56 inner strands of Alpha-OCC μ -Conductor are annealed for improved midrange and low frequencies, while the 29 outer strands are straight Alpha-OCC conductors that carry the high frequencies. The Power-18 features a PE dielectric surrounded by Teflon, twin anti-resonance PVC sheaths, carefully-engineered wire clamps for tight contact, and all metal parts are subjected to the deep cryogenic and demagnetizing Super Alpha Process.

Plug an Absolute Power-18 power cord into one of Furutech's resonance-damped carbon fiber-over-stainless outlet with a Furutech top-quality receptacle and you've gone a long way towards better sound. Add a Pure Power 6 or e-TP609 power distributor or e-TP80 filtered AC distributor to connect all your components for a powerful, suave, and satisfying musical experience.

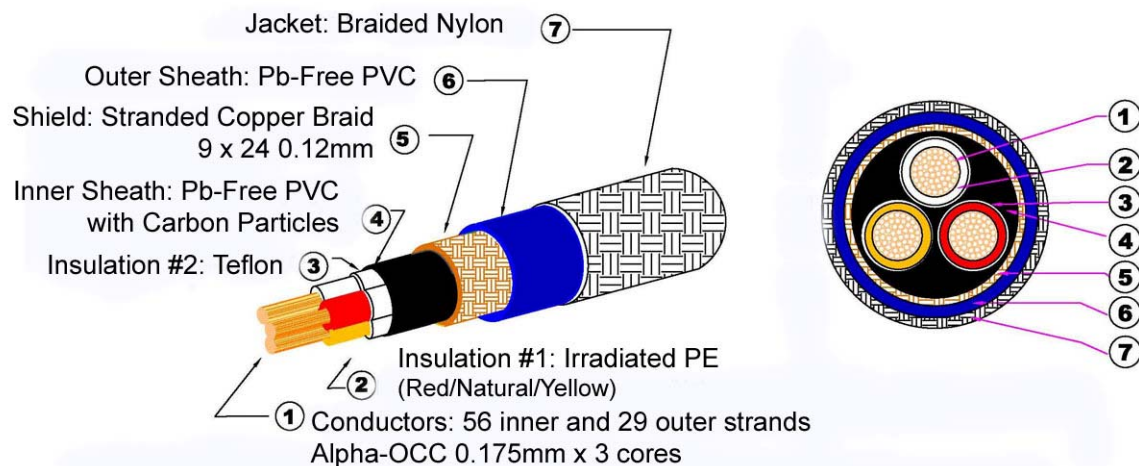

MSRP: \$280 • AVAILABLE: NOW

Features:

- 56 inner strands of α (Alpha)-OCC μ -Conductors and 29 outer strands of α (Alpha)-OCC Conductors x 3 PVC cores
- Dielectric/Insulation #1: High-quality polyethylene PE reducing capacitance
- Insulation #2 surrounding PE dielectric: Teflon
- High-performance beautifully-engineered rhodium-plated IEC [FI-15E(R)] and connector [FI-15ME(R)]
 - Male: Rhodium-plated nonmagnetic α (Alpha) pure copper
 - Female: Rhodium-plated nonmagnetic α (Alpha) pure copper
- Earth/Ground Jumper System (US Patent No.: 6,669,491)
- Furutech's unique wire-clamping mechanism guarantees ultra firm connections
- Twin Flexible PVC sheaths improve vibration isolation
 - Inner sheath incorporates carbon particles for improved damping
- PVC and Teflon insulated shield with stranded-wire braid for superior noise isolation
- All metal parts treated with the deep cryogenic and demagnetizing Alpha Process

Construction and Materials

- 56 inner and 29 outer strands • 0.175mm diameter α Alpha-OCC x 3 cores • 1.9mm dia.
- Dielectric/Insulation: Polyethylene (Red/Natural/Yellow) 3.5mm diameter
- Sheath (Inner): Ultra-flexible PVC (Black) 9.5mm diameter
- Shield: 9 x 24 0.12mm braided copper wire
- Sheath (Outer): Ultra-flexible PVC (Dark Blue) 14.2mm diameter
- Jacket: Braided nylon approx. 15.5mm

Absolute Power-18 Cable Construction

The Critics Speak

"... By any rational standard extremely high-performance cables ... If, like me, you appreciate taking many sonic steps forward and no steps backward, you'll want to give these components a try."

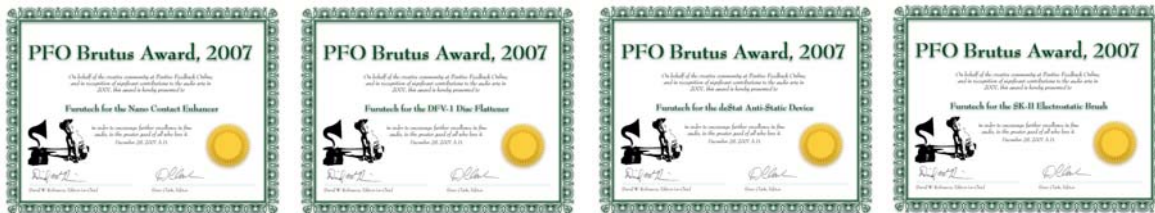

-- Chris Martens, August 07 *the Absolute Sound*

"After many hours of listening, my appreciation ... grew because of how non-fatiguing they can be while still revealing a very high level of detail. The extension of both treble and bass is excellent but it is the wholeness and balance of the sound that makes the Furutech ... stand out."

--Jay Fisher, *6moons.com*

"If I had to limit myself to one key term ... I'd opt for relaxed ultra resolution. ... Things sound bigger. ... [Under high SPLs] there's ... no compression, smearing or skewing ... The sense of big simply gets bigger ... something luxurious and silken about the Furutech connectors. Like fine Swiss watches ... perform to a very high standard, getting the tactile satisfaction and pride of ownership..."

--Srajan Ebaen, *6moons.com*

Furutech makes a wide variety of high performance 15A and 20A A/V cable and power connectors and parts, as well as distribution/filtering products like the new 120Hz standard xv1.3 HDMI cable, Ag-12 Silver Tonearm Cable, Pure Power 6, e-TP4+4, e-TP609 and e-TP60 Power Distributors, and e-TP80 Power Filters, deMag Disc and Cable Demagnetizer, the deStat, a fan-driven, Balanced Ion Drive device for totally eliminating static from LPs and CDs, DFV-1 LP Flattener, lightweight and stylish FRD Room Diffusion Panels, PC-2 Disc Pure Cleaner, and their own very special NANO Liquid Contact Enhancer, plus even more fine cable and OEM products.
