DFV-1 Record Flattener ***One-Stop, One-Button Solution for Warped Records*** ***Right From The Oven To Your Platter!***

"Furutech Saves the Day! [The DFV-1 and DeMag are] Two must have accessories for the hardcore vinyl enthusiast! At this pace ... the DFV-1 will have paid for itself by the end of the year. Those of you with voracious appetites for vinyl will find this little gadget indispensable."

--Jeff Dorgay, ToneAudio.com

Summer 2008 Update! Furutech Co., Ltd., manufacturer of analog and digital audio and video cable and accessories, features the ultimate LP flattener, the DFV-1.

Every vinyl enthusiast has records in their collection that they wish were a bit less warped. The DFV-1 is the one-stop, one-button solution to your problems! Using a carefully controlled heating and cooling cycle it flatten all your warped records, even those with only slight irregularities that still unsettle your cartridge causing mistracking.

Warps and Listening

Warps are detrimental in every way. If the arm/cartridge remains parallel to the LP's surface as when playing a flat record, VTA (Vertical Tracking Angle) remains unchanged during play. Additionally, as the arm/cartridge tracks a warp on its upside, greater pressure is placed on the stylus which changes VTF (Vertical Tracking Force) until the peak of the warp, whereupon the cartridge "unloads" with too little VTF on the way down the slope of the warp. This muddles the sound, changes the tonal quality, imaging and soundstage characteristics of any cartridge. A flat record tracks better with less distortion.

The DFV-1 takes up little room with its space-saving, vertical design! Improved film heating technology optimizes the entire heating and cooling cycle for a perfectly flat LP that you and your cartridge will love. Just unlock and open the DFV-1, place the LP on the spindle, close and tap a single button. An LCD keeps you informed of progress with a tone sounding when done. Right from the oven to your platter!

MSRP: \$1,628

DFV-1 Specifications

Rating:.....117V±10% 60Hz AC Line 2A fuse
Energy Consumption.....170W (max) 35W (Norm)
Heating plate max. temp..... 65
Size:.....480mm/19" W x 544mm/21.5" H x 17mm/7" D
Weight:.....11kg/24lbs approx.
Safe Usage Environment:..... Humidity 20% - 90% (No condensation)
Manufactured for Furutech by ORB High End Systems of Japan

All metal parts treated with Furutech's α Alpha Cryogenic & Demagnetizing Process

Winner of Four Positive Feedback Online Brutus Awards for the the DFV-1 LP Flattener, the DeStat, the Select Series SK-II Antistatic Brush and Nano Fluid Contact Enhancer! The DeMag is an International 2007 International CEA Best of Innovations Award Winner!

Furutech makes a wide variety of high performance 15A and 20A A/V cable and power connectors and parts, as well as distribution/filtering products like the cost-no-object Pure Power 6, the Dual Mode e-TP4+4, the popular e-TP609, the e-TP60 Power Distributors, and e-TP80 Power Distributor/Filter, the award-winning deMag and DFV-1 LP Flattener, the deStat, a fan-driven, Balanced Ion Drive device for totally eliminating static from LPs and CDs, lightweight and stylish FRD Room Diffusion Panels, PC-2 Disc Pure Cleaner, and their own very special NANO Liquid Contact Enhancer, plus even more fine cable and OEM products.

Make a More Powerful Connection with Furutech!
