Furutech Speakerflux Jumper Cables ***Don't Constrain Your System at the Speaker Terminals*** ***FP201R Spade Connectors or FB200BR Bananas***

Furutech Co., Ltd., manufacturer of ultra refined analog, digital, video cable and accessories, debuts their top-of-the-line Speakerflux Jumper Cables, terminated with high-quality bananas plugs or spade lugs. The Flux series are, by far, the most revealing cable Furutech has ever made, designed to work best in an all-Flux systems including Lineflux, Speakerflux, Powerflux AC cords along with the Flux-50 Inline AC Filter and Daytona 303 for active and passive AC filtering and power distribution.

Everything Matters

Most enthusiasts know that everything in the signal path makes a difference, and that includes the jumpers used in biwired speakers system. Most jumper cables supplied by speaker manufacturers are adequate for the job, but Furutech has never subscribed to merely adequate. Furutech Speakerflux Jumper Cables use high-purity large diameter 6mm-squared α (Alpha) conductor for minimal internal impedance. Choose beautifully engineered FP-201R nonmagnetic pure-copper rhodium-plated spade connectors, or specify FP200BR nonmagnetic eutectic copper alloy rhodium-plated banana connectors. The Jumpers feature an insulation/dielectric of high-grade PE that reduces capacitance and resonance. The jacketing is RoHS-compliant PVC.
